LED & LCD Videowalls

1.5mm LED

Absen's ultra-high definition panel allow a full HD image at 3 metres and UHD at 5 metres. This product is the perfect solution for presentation areas, conferences and high detailed content are low level. With the ability to curve at fantastic wide angle viewing, this product is at the forefront of technology. We're delighted to support this product being one of only a few in Europe.

2.6mm LED

Uni-lumens high definition panel is an extremely versatile product, it can be flat mounted, on a curve or part of corner display attractor. With high definition achieved in 5 metres, it's a cost effective solution to standing out from the crowd. With over 800 square metres in stock, we can fulfil your needs.

[Click here to find out more.](#)

3.9mm LED

Digileds 3.9mm is a hugely popular product, with flat mounting & curved solutions available, standing out from the crowd is achieved with ease. That's coupled with being the ideal banner or poster solution, the possibilities are endless. This product completes the range and provides a solution for all budgets.

Please note all products have been chosen to keep build times to a minimum and are all able to be flown or installed within an aperture.
