Freeman Sustainability **Our Commitment**

Policy

Freeman EMEA's policy focuses on reducing greenhouse gas emissions and waste footprint within the events we deliver. It aims to increase environmental awareness across the organization and among stakeholders, embedding carbon reduction and zero-waste practices in everyday business

Towards Net Zero

Freeman EMEA supports and is a signatory of the Net Zero Carbon Events pledge, which aims to communicate the industry's commitment to tackling climate change. The group has constructed an industry – wide roadmap toward net zero by 2050

Reporting

Freeman EMEA is committed to measuring greenhouse gas emissions for all event deliveries on an ongoing basis. This includes emissions from energy, travel and transport, catering, and production as appropriate. We aim to reduce event emissions in line with a 1.5°C pathway and ensure transparency by monitoring our performance against our objectives via [TRACE by isla](#) and providing carbon emission reporting for each event.
